Community comment on "Assessing Responses and Impacts of Solar climate intervention on the Earth system with stratospheric aerosol injection (ARISE-SAI): protocol and initial results from the first simulations" by Jadwiga H. Richter et al., EGUsphere, https://doi.org/10.5194/egusphere-2022-125-CC5, 2022

I object to the use of the word "experiments" when refering to computer simulations of anything. The word "experiments" should be reserved for actual physical experiments in the real world, not computer simulations where we have no idea how well the computer models might simulate the real world.
