AE comment on esurf-2021-97

Jens Turowski (Editor)

Editor comment on "Regularity of transportation for cohesive bank-collapsed materials" by Guosheng Duan and Haifei Liu, Earth Surf. Dynam. Discuss., https://doi.org/10.5194/esurf-2021-97-EC1, 2022

Dear authors,

□□□□□□□!

We have now received two reviews for your paper. Reviewer #2, in particular, raises some serious concerns, related to the presentation and use of the experimental data and to the modelling appraoch. I generally agree with this assessment and ask you to provide appropriate revisions. Both points seem substantial to me and could require major revisions of the paper.

I am looking forward to seeing your revised manuscript. Please include a rebuttal, including replies to all of the comments and detailing the changes you made.

With all the best wishes,

Jens Turowski
