Dear referees,

Thank you for your careful review of our manuscript. We appreciate the referee for the insightful comments and constructive suggestions. These comments and suggestions are all very helpful for improving our manuscript. We have considered all the points as discussed in the supplement and have revised the manuscript accordingly. The changes have been highlighted in blue and red fonts in the revised version by using the \LaTeX diff tool. We sincerely hope that the manuscript in its revised form will satisfy the queries of the referee and will be accepted for publication.

Please also note the supplement to this comment:
