Editor Comment on hess-2021-551

Hubert H.G. Savenije (Editor)

Editor comment on "Extraction of roughness parameters from remotely-sensed products for hydrology applications" by Charlotte Marie Emery et al., Hydrol. Earth Syst. Sci. Discuss., https://doi.org/10.5194/hess-2021-551-EC1, 2022

Dear Authors,

You have received two very detailed and extensive reviews, which I am sure will benefit your research very much if you follow-up on these comments. I am afraid that the paper in the present state has to be rejected. I cannot see how a revised paper would become acceptable within a reasonable period of time. After you have fully revised your work and benefited from the comments provided, you may submit it as a new paper, or submit it somewhere else. But make sure you have made the necessary revision before doing so.
