Comment on nhess-2021-132

Anonymous Referee #1

Referee comment on "Achieving Sendai Framework in Africa: Progress and challenges toward Target E" by Nyandiko Nicodemus and Otwori Dennis, Nat. Hazards Earth Syst. Sci. Discuss., https://doi.org/10.5194/nhess-2021-132-RC1, 2021

The work handles a very interesting topic and tries to highlight the current situation in the countries under analysis.

However, some corrections should be made to better frame the contents:

- Target E should be introduced and explained properly for the readers
- Explenation of the "ten- point" should be more comphensive and the 4 priorities of the Sendai Framework taken into account should be properly introduced to the reader
- English should be revised (grammatically incorrect or non clear sentences)
- Provide list of abbreviations
