Comment on soil-2021-14

Ashish Malik (Editor)

Editor comment on "Whole-soil warming decreases abundance and modifies the community structure of microorganisms in the subsoil but not in surface soil" by Cyrill U. Zosso et al., SOIL Discuss., https://doi.org/10.5194/soil-2021-14-EC1, 2021

I think the figures can be improved a bit. Results of statitical analysis can be presented to make it easy for the reader to judge those that are significant. In Figure 2 and 3, the y-axis is missing.
