Author comment on "Kara and Barents sea ice thickness estimation based on CryoSat-2 radar altimeter and Sentinel-1 dual-polarized synthetic aperture radar" by Juha Karvonen et al., The Cryosphere Discuss., https://doi.org/10.5194/tc-2021-185-AC3, 2021

Dear reviewer 3,

Thank You for the comments. We have provided response to Your comments in the included pdf file. We have decided to use newer version of CS-2 SIT data in the revised version of the data. Because this will include a lot of work and we have also other duties, the completion of the revised version will require some time.

Sincerely,

Authors of the manuscript
