

Interactive comment on “Ice Crystal Characterization in Cirrus Clouds: A Sun-tracking Camera System and Automated Detection Algorithm for Halo Displays” by Linda Forster et al.

Anonymous Referee #3

Received and published: 6 April 2017

my general comment was more motivated by the general rules of the Copernicus system rather than by the specific case here. Maybe, getting informed that someone had posted a review under his name was making the procedure even more obvious to me, but this was not the main reason for my statement. I would appreciate if the journal editors and Copernicus officials would consider my comments seriously.
