Interactive comment on "Sources and characteristics of terrestrial carbon in Holocene-scale sediments of the East Siberian Sea" *by* Kirsi Keskitalo et al.

T. Cronin (Referee)

tcronin@usgs.gov

This is an excellent, well-written paper. Minor queries are made as inserted comments in the attached PDF. Minor revision is needed, but an organic geochemist should also read the paper.

Please also note the supplement to this comment:
