

Interactive comment on “Intensity of geodynamic processes in the Lithuanian part of the Curonian Spit” by Algimantas Česnulevičius et al.

Algimantas Česnulevičius et al.

algimantas.cesnulevicius@gf.vu.lt

Received and published: 31 March 2017

Dear reviewer.

Thank You for thorough analysis of our manuscript.

We send response for You notes: 1. Added in Fig. 3 sign of sandbound and contemporary settlements (A part) and marked cross-section places, which are in Fig. 1 and Fig. 4 (B part). 2. In line 76 changed term “dune tectonic” in “tectonic subsidence”. 3. Added information about hurricane influence on dunes surface changes (185 – 190 line). 4. In References added Lampe et al., 2011. 5. Transpose the first and second position in References.

Thank You very much

C1

Best regards

Algimantas Česnulevičius Regina Morkūnaitė
