Dear anonymous Referee #2,

we thank you very much for the assessment and evaluation of our manuscript and appreciate the encouraging and valuable comments. To facilitate a transparent and fruitful discussion we replied to every single comment in detail in the attached document.

We chose this format in order to document the large number of arguments and changes as thorough and careful as possible. Also, based on the comments we extended our manuscript substantially. With this additional work we hope to have overcome the flaws

of the previous version.

Thanks for considering our work for publication in ESURF.

All the best, Antonius Golly
