

***Interactive comment on “Numerical Framework for the Computation of Urban Flux Footprints Employing Large-eddy Simulation and Lagrangian Stochastic Modeling” by Mikko Auvinen et al.***

**J. C. Hargreaves**

jules@blueskiesresearch.org.uk

Received and published: 2 February 2017

It is now possible to filter GMD papers according to paper type, so it is a bit more important to assign the correct type to manuscripts. Please see the paper types page: [http://www.geoscientific-model-development.net/about/manuscript\\_types.html](http://www.geoscientific-model-development.net/about/manuscript_types.html). I wonder if this manuscript may better fit in the Model Description than the Development and Technical paper type. If so, please can you ask Copernicus to change the paper type.
