

Interactive comment on “Numerical Framework for the Computation of Urban Flux Footprints Employing Large-eddy Simulation and Lagrangian Stochastic Modeling” by Mikko Auvinen et al.

J. C. Hargreaves

jules@blueskiesresearch.org.uk

Received and published: 2 February 2017

It is now possible to filter GMD papers according to paper type, so it is a bit more important to assign the correct type to manuscripts. Please see the paper types page: http://www.geoscientific-model-development.net/about/manuscript_types.html. I wonder if this manuscript may better fit in the Model Description than the Development and Technical paper type. If so, please can you ask Copernicus to change the paper type.

Interactive comment on Geosci. Model Dev. Discuss., doi:10.5194/gmd-2016-302, 2017.
