Based on the two reviews, I conclude that there is a lack of clarity in the presentation. In addressing your replies, I suggest that you explain in detail to the points of the reviewers and also suggest how you will improve the paper. The reviews provide good guidance for improvement.

One aspect that needs to be addressed is the horizontal component. I agree with the reviewers that a substantial amount of work needs to be devoted to address this comment. Ideally, you implement the spatial autocorrelation and add it to the paper, as you claim that this is feasible.
