Dear Marc, thank you very much for your revision. We have followed all your suggestions, and we believe that now the manuscript is of a better quality.

Please find attached your revision with our comments, edited in Adobe using the highlighted text and comment tool. Please, note that in order to keep this option working on the document we had to zipped the file (i.e. you'll download a zip file with the pdf doc inside). Uploading to Copernicus the file as a just a pdf didn't work.

I just want to point out that the major change in relation to your revision has been

including the equations about the method for calculating recurrence interval in QAFI.

On behalf of the authors, Julián García Mayordomo
