Author comment on "Opinion: Papers that shaped tropospheric chemistry" by Paul S. Monks et al., Atmos. Chem. Phys. Discuss., https://doi.org/10.5194/acp-2020-1266-AC17, 2021

The gap with respect to PSS and the chemiluminescence measurement of NO/NO\textsubscript{2} is acknowledged. The Kley and McFarland (1980) reference has been added. Following the comments on Stedman's work on the measurement and quantification of exhaust emissions suitable reference has been added. The authors are grateful for the thought comments.
