Thank you for your interest in our paper and for the comment. Indeed, thanks to your comment, we realized that the wrong reference was used here. Instead, it should have been Linz et al. 2017 (see below). This paper describes the data set. Briefly, AoA was calculated from the GOZCARDS satellite data product (Froidevaux et al. 2015), using N<sub>2</sub>O data by employing an empirical relationship between AoA and N<sub>2</sub>O (based on Andrews et al. 2001, and described further in Linz et al, 2017).
