Thanks for this important paper. Figure 3 shows several estimations of Age of Air at 50hPa, including one derived from N<sub>2</sub>O observations through the GOZCARDS dataset. I would like to know more about this AoA estimation, but the corresponding reference (Linz et al., 2016) does not mention GOZCARDS nor does it show any such latitudinal distribution of AoA. Do you have a better reference for this?
