Yanda Zhang et al.

Author comment on "Impacts of long-range-transported mineral dust on summertime convective cloud and precipitation: a case study over the Taiwan region" by Yanda Zhang et al., Atmos. Chem. Phys. Discuss., <https://doi.org/10.5194/acp-2021-374-AC3>, 2021

The Figure S5 caption should be: "In the High-Pcp area during P2: (a) the vertical vapor fluxes averaged over grids with the top 10 percentiles of the updrafts (90th to 100th) simulated by the SBM runs; (b) vertical profiles of latent heating rates averaged among precipitation grids simulated by SBM-Clean (blue lines) & Dusty (red lines) runs." Sorry for the mistake.
