Comment on acp-2021-387

Timothy Garrett (Editor)

Editor comment on "Inter-annual, seasonal and diurnal features of the cloud liquid water path over the land surface and various water bodies in Northern Europe as obtained from the satellite observations by the SEVIRI instrument in 2011-2017" by Vladimir S. Kostsov et al., Atmos. Chem. Phys. Discuss., <https://doi.org/10.5194/acp-2021-387-EC1>, 2022

Dear Dr. Kostov,

Many apologies for the delays in the editorial handling and review process.

The Reviewers mention some substantial criticisms of the manuscript that I look forward to being addressed in a point-by-point fashion following ACP guidelines. I will particularly hope to see extension of the relevant datasets where justified as suggested by Reviewer 1 and discussion of the relevant dynamics as suggested by Reviewer 2.

Best regards,

Tim Garrett
