Author comment on "Measurement report: Particle-size-dependent fluorescence properties of water-soluble organic compounds (WSOCs) and their atmospheric implications for the aging of WSOCs" by Juanjuan Qin et al., Atmos. Chem. Phys. Discuss., https://doi.org/10.5194/acp-2021-465-AC1, 2021

Dear reviewer:

Thank you very much for your recommendation of our research "Particle size-dependent fluorescence properties of water-soluble organic compounds (WSOC) and their atmospheric implications on the aging of WSOC". It is very kind of you to give comprehensive and thoughtful advice on the present research. We have carefully addressed all of the comments and explained them in the following supplement file because some of the corrections can not show on the present page. We have modified the language though out the article as well. Thank you again.
