Author comment on "Constant flux layers with gravitational settling: links to aerosols, fog and deposition velocities" by Peter A. Taylor, Atmos. Chem. Phys. Discuss.,
<https://doi.org/10.5194/acp-2021-594-AC1>, 2021

I much appreciate Dr Beljaars generous comments. The suggestion re line 240 will be acted upon.

In view of comments by referee #2 I will limit the discussion of deposition velocity in the revised paper. It is however a topic of broad interest and I will continue to work on that aspect.
