Comment on acp-2021-687

Anonymous Referee #1

Referee comment on "Reassessment of the radiocesium resuspension flux from contaminated ground surfaces in eastern Japan" by Mizuo Kajino et al., Atmos. Chem. Phys. Discuss., <https://doi.org/10.5194/acp-2021-687-RC1>, 2021

Dear Authors,

In the "2.1 Observation data" section, there is no information about the height above ground level at which samplings were performed. The amount of resuspended material clearly depends on this height and this information may help understanding some discrepancies between the different sampling locations.
