## Comment on **acp-2021-785**

Daniel Potts

---

Community comment on "Ozone pollution during the COVID-19 lockdown in the spring 2020 over Europe analysed from satellite observations, in situ measurements and models" by Juan Cuesta et al., Atmos. Chem. Phys. Discuss., <https://doi.org/10.5194/acp-2021-785-CC1>, 2021

---

Very interesting study. Our study, <https://doi.org/10.1088/1748-9326/abde5d>, where TROPOMI, in situ surface measurements and the chemical transport model GEOS-Chem were used to investigate lockdown emission changes of NO<sub>2</sub>, Ozone and PM<sub>2.5</sub> over the UK should be cited here as relevant work (introductory section lines 65-80).
