Comment on acp-2021-897
Roland Vernooij et al.

Author comment on "Stable carbon isotopic composition of biomass burning emissions – implications for estimating the contribution of C3 and C4 plants" by Roland Vernooij et al., Atmos. Chem. Phys. Discuss., https://doi.org/10.5194/acp-2021-897-AC1, 2022

We thank both reviewers and the editor for their time and effort in assessing our manuscript, and the detailed and constructive comments which helped to improve the quality of this paper. Please find below our point-to-point response to the reviews. The revised text and updated figures are included in the updated manuscript. A separate 'track-changes' document is included to emphasize the changes to the manuscript.
