Sourish Basu et al.

Author comment on "Estimating emissions of methane consistent with atmospheric measurements of methane and $\delta^{13}\text{C}$ of methane" by Sourish Basu et al., Atmos. Chem. Phys. Discuss., <https://doi.org/10.5194/acp-2022-317-AC4>, 2022

In response to the reviewer's curiosity about the monsoonal Tropics, we have added numbers for three additional latitude bands, 90°S-30°S, 30°S-30°N and 30°N-90°N, to Table 4. We have also added the change from 30°S-30°N (monsoonal Tropics) as an additional panel to Figure 11. We hope this will make comparison easier to other methane studies which uses this definition of the Tropics.
