Comment on acp-2022-379

Marios Panagi et al.

Author comment on "Daily evolution of VOCs in Beijing: chemistry, emissions, transport, and policy implications" by Marios Panagi et al., Atmos. Chem. Phys. Discuss.,
<https://doi.org/10.5194/acp-2022-379-AC1>, 2022

There is a hidden historical error in the version used of the GEOS-Chem model which outputs the concentrations in ppb when they should be in ppb C. This error led to an incorrect comparison of GEOS-Chem with our other model that's described in the paper. This error doesn't affect the manuscript key results and conclusions (in fact the two models now agree more closely on the monthly averages) but some numbers in section 3.6 of the manuscript need to change. The corrections will be introduced in the manuscript along with the reviewers comments
