Community comment on "Comparative characterization of the performance of bio-aerosol nebulizers in connection with atmospheric simulation chambers" by Silvia G. Danelli et al., Atmos. Meas. Tech. Discuss., <https://doi.org/10.5194/amt-2020-490-CC1>, 2021

The authors want to thank the Anonymous Referee #1 for the very useful comments, which will be addressed in the revised version of the manuscript.

Very quickly, the authors want to point out that, in Fig. 3, the nebulization efficiency is given as a percentage values (i.e. the maximum is around 1.2%). We will revise the figure caption to avoid misunderstandings.
