Comment on amt-2020-498

Anonymous Referee #1

Referee comment on "On-line solid phase microextraction derivatization for the sensitive determination of multi-oxygenated volatile compounds in air" by Esther Borrás et al., Atmos. Meas. Tech. Discuss., https://doi.org/10.5194/amt-2020-498-RC1, 2021

The paper is the sum of excellent quality work and I would recommend it as a valuable asset for researcher performing simulation chambers experiments.

The authors should consider minor revision prior to publication.
