Community comment on "Four-dimensional mesospheric and lower thermospheric wind fields using Gaussian process regression on multistatic specular meteor radar observations" by Ryan Volz et al., Atmos. Meas. Tech. Discuss.,
<https://doi.org/10.5194/amt-2021-40-CC5>, 2021

Dear Ryan,

to avoid misreading of my comment on the WGS84 geometry. We had a scientific presentation and agreed to share all the geometric aspects necessary for the retrievals. Please don't consider it as an accusation. This was not intended. So my apologies if it is someone understood like that.

I suggest it is best to cite Clahsen (2018) and Stober et al., 2018.

Best regards,

Gunter
