Comment on angeo-2021-36

J. D. Perez (Referee)

Referee comment on "Terrestrial exospheric dayside H-density profile at 3–15 $\square R_E$ from UVIS/HDAC and TWINS Lyman- α data combined" by Jochen H. Zoenchen et al., Ann. Geophys. Discuss., <https://doi.org/10.5194/angeo-2021-36-RC1>, 2021

I have attached a file with my comments.

I feel compelled to add the comment that I find it very hard to some of the yes/no questions above.

Please also note the supplement to this comment:
