Comment on angeo-2021-65

Jun-Young Hwang et al.

Author comment on "Propagating characteristics of mesospheric gravity waves observed by an OI 557.7 nm airglow all-sky camera at Mt. Bohyun (36.2°N, 128.9°E)" by Jun-Young Hwang et al., Ann. Geophys. Discuss.,
<https://doi.org/10.5194/angeo-2021-65-AC3>, 2022

Dear Topical editor,

Thank you for evaluating our paper "angeo-2021-65".

I would like to request that a decision be made on this paper as soon as possible. The reason is that publication fees must be notified before February 15th or the funds will be exhausted.

Here I upload the combined response letter file with some additions from the revised manuscript.

Best regards.

Please also note the supplement to this comment:
