Author comment on "Methane gas emissions from savanna fires: what analysis of local burning regimes in a working West African landscape tell us" by Paul Laris et al.,
Biogeosciences Discuss., <https://doi.org/10.5194/bg-2020-476-AC4>, 2021

Thank you for a helpful review. There were a couple of suggestions that were not clear to us, otherwise we made all changes to a revision and added a new section on statistical analysis.

If you have suggested West African references on methane emissions from fire, please forward and I will include.

Please also note the supplement to this comment:
