Raquel Flynn et al.

Author comment on "Summertime productivity and carbon export potential in the Weddell Sea, with a focus on the waters adjacent to Larsen C Ice Shelf" by Raquel Flynn et al., Biogeosciences Discuss., <https://doi.org/10.5194/bg-2021-122-AC2>, 2021

We thank the reviewers for their comments, which will definitely improve our manuscript. In the attached document we respond to each of the reviewers' comments in turn and outline the changes we will make to the manuscript in response. Reviewer 2 also added a number of comments directly to the pdf of the manuscript; we have responded to each of these on the pdf. Within these comments, the reviewer made numerous suggestions related to word choice, style, etc. We will make the suggested changes where they improve the clarity or precision of our argument, but in the case where they are purely stylistic, we have generally chosen not to make the edits.

Please also note the supplement to this comment:
