Author comment on "Comment on K. Michaelian and A. Simeonov (2015) "Fundamental molecules of life are pigments which arose and co-evolved as a response to the thermodynamic imperative of dissipating the prevailing solar spectrum"" by Lars Olof Björn, Biogeosciences Discuss., <https://doi.org/10.5194/bg-2021-135-AC1>, 2021

I do not oppose the publication of reply CC3 by Karo Michaelian and Aleksandar Simeonov.

Lars Olof Björn
