William Martin (Referee)

Referee comment on "Comment on "Fundamental molecules of life are pigments which arose and co-evolved as a response to the thermodynamic imperative of dissipating the prevailing solar spectrum" by K. Michaelian and A. Simeonov (2015)" by Lars Olof Björn, Biogeosciences Discuss., <https://doi.org/10.5194/bg-2021-135-RC6>, 2021

Michaelian's (erroneous) comments are about me as a person rather than about the paper or the science. That is abuse, which I hereby report.
