Title of the Paper: Mangrove sediment organic carbon storage and sources in relation to
forest age and position along a deltaic salinity gradient

Review Comments:

- The objective of the paper was to quantify and identify first-order controls of sediment organic carbon stocks and sources along an estuarine land-to-sea gradient and between old and young mangrove forest sites in the Guayas Delta, Ecuador.

- The paper is well drafted and supported by quality data set; however I suggest checking the language of the paper to avoid grammatical errors.

- -In line 76 Kristensen, 2008 and in list in line 567 Kristensen, E., Bouillon, S., Dittmar, T., & Marchand, C. (2008);
