

under projected anthropogenic climate change. This study was not published at the time of submission, but it seems that it could now be incorporated to discuss how these two approaches support each other in their findings and conclusions.

*Huntley, B. et al. 2021. Projected climatic changes lead to biome changes in areas of previously constant biome. - J Biogeogr: DOI: 10.1111/jbi.14213*

Minor comments:

- 20-21: This sentence could be simplified to "It has been suggested that some geographic areas (...) because they have had (...)"
- 77-78: There is no mention of invasive species anywhere else in the paper, which makes this sentence quite out of topic. Could be deleted?
- 56: Missing dot in "distance.time<sup>-1</sup>"
