Community comment on "Nutrients attenuate the negative effect of ocean acidification on reef coral calcification in the Arabian Sea upwelling zone (Masirah Island, Oman)" by Philipp Michael Spreter et al., Biogeosciences Discuss., <https://doi.org/10.5194/bg-2021-213-CC2>, 2021

Thank you for this comment regarding the origin of JCp-1. We have added the missing citation (Garbe-Schönberg and Müller, 2014) to the methods section of the main text.

The reference values listed in Appendix S1 already include the reference to the paper by Jochum et al. 2019.

Thank you for improving our manuscript.
