Jessica Plein et al.

Author comment on "Response of vegetation and carbon fluxes to brown lemming herbivory in northern Alaska" by Jessica Plein et al., Biogeosciences Discuss.,
<https://doi.org/10.5194/bg-2021-286-AC2>, 2022

We thank the referee for the detailed in-line notes and positive feedback about our study. We included in this point-to-point response only the comments provided in this document, not the ones included within the manuscript, as those were mostly grammar and style. These will be addressed once we prepare the manuscript for resubmission.

Please also note the supplement to this comment:
