Author comment on "Test-Size Evolution of the planktonic foraminifer Globorotalia menardii in the Eastern Tropical Atlantic since the Late Miocene" by Thore Friesenhagen, Biogeosciences Discuss., https://doi.org/10.5194/bg-2021-67-AC1, 2021

I thank Nisan Sariaslan for her comment.

**Comment:** “In the title, instead of "the planktonic Foraminifera Globorotalia menardii", it should be "the planktonic Foraminifer Globorotalia menardii".”

**Response:** Following Lipps et al. (2011) “What should we call the Foraminifera?”, the term “foraminifera” can be used either as a singular or a plural form. However, I will adopt her suggestion to follow one set of terms throughout the paper.
