Editor comment on "Pronounced seasonal and spatial variability in determinants of phytoplankton biomass dynamics along a near–offshore gradient in the southern North Sea" by Viviana Otero et al., Biogeosciences Discuss., https://doi.org/10.5194/bg-2022-11-EC1, 2022

The intention to revise the manuscript based on the majority of the suggested changes by the reviewers is OK. The revised version can be submitted, so a final discussion on publication can be made. Can currently not be done, as only feedback on the reviewers comments is added.
