Author comment on "Mineralization of autochthonous particulate organic carbon is a fast channel of organic matter turnover in Germany's largest drinking water reservoir" by Marlene Dordoni et al., Biogeosciences Discuss., <https://doi.org/10.5194/bg-2022-154-AC1>, 2022

Dear Reviewer 1,

thank you for providing us your comments. We did our best to address the constructive criticisms.

Please find our answers in the table attached.

With kind regards and on behalf of all co-authors

Marlene Dordoni (PhD student)
