Author comment on manuscript "Effect of droughts on future weathering rates in Sweden"
(Biogeosciences discussion bg-2022-78)

Introduction

We thank the anonymous referee for them taking their time to help us with our manuscript, their impressively thorough reading, critical look and many thoughtful comments that will improve the quality and readability our manuscript. We are happy to apply revisions to improve our manuscript as formulated in the answers to the referee comments in the attached document, where we will repeat the comments from anonymous referee #1 in blue, with our answers in black.

Please also note the supplement to this comment:
