Author comment on manuscript "Effect of droughts on future weathering rates in Sweden"
(Biogeosciences discussion bg-2022-78)

Introduction

We thank dr. Katrin Fleischer for her thorough reading, critical look and many thoughtful comments that will improve the quality and readability our manuscript. Especially the comments on how to structure the text, with many good ideas on how to present the scenarios and the results, which will improve the study. We are happy to apply revisions to improve our manuscript as formulated in the answers to the referee comments in the attached document. We will repeat the comments from dr. Katrin Fleischer in red, with our answers in black.

Please also note the supplement to this comment:
