Comment on bg-2022-78

Anonymous Referee #2

Referee comment on "Effect of droughts on future weathering rates in Sweden" by
Veronika Kronnäs et al., Biogeosciences Discuss.,
<https://doi.org/10.5194/bg-2022-78-RC2>, 2022

The manuscript "Effect of droughts on future weathering rates in Sweden" by Kronnäs et al, investigates warming effects on weathering in Scandinavia. The modelling exercise conducted by the authors is certainly interesting and should be a valuable contribution to literature. However the manuscript is in part unprecise in it's language and some findings are overstated. My assessment is in line with the comments posted by Reviewer 1 and Dr. Fleischer. I reccomend that the authors consider the extensive and in depth assessments of Reviewer 1 and Dr. Fleischer in a revised version of the manuscript.
