Luisa Schmidt et al.

Author comment on "Assessing the sensitivity of multi-frequency passive microwave vegetation optical depth to vegetation properties" by Luisa Schmidt et al., Biogeosciences Discuss., <https://doi.org/10.5194/bg-2022-85-AC2>, 2022

Dear Mr. Baur,

Thank you for your time and effort to provide precisely and detailed comments to this manuscript and the given opportunity for us to submit a reply. Specifically, it was pointed out that improvements are necessary for the understanding and traceability of the methods, data and results. We will address these by revising section 2 and by moving results of the supplementary to the main manuscript.

We addressed the specific comments as well as the line-specific comments line-by-line within the attached pdf document.

- Luisa Schmidt

Please also note the supplement to this comment:
