Please find the attached PDF with our point-by-point replies to all three reviewer comments. There are some key issues raised by all three reviewers and therefore we decided to prepare a joint response. We will first answer the common comments and then provide a point-by-point response individually to all reviewers. After our responses we have included manuscript and supplement showing details of the changes made in response to reviewer comments.

Best regards, Liisa Ilvonen (on behalf of the author team)
