Irene Schimmelpfennig et al.

Author comment on "Glacier response to Holocene warmth inferred from in situ ^{10}Be and ^{14}C bedrock analyses in Steingletscher's forefield (central Swiss Alps)" by Irene Schimmelpfennig et al., Clim. Past Discuss., <https://doi.org/10.5194/cp-2021-110-AC1>, 2021

Dear Prof Wanner,

We greatly appreciate your constructive comment. You are right, the currently known forcing factors responsible for the glacier advances and retreats need to be described. We will add a corresponding paragraph in the revised version of the manuscript. Thank you very much!
