Community comment on "Climate signals in stable carbon and hydrogen isotopes of lignin methoxy groups from southern German beech trees" by Anna Wieland et al., Clim. Past Discuss., <https://doi.org/10.5194/cp-2021-135-CC1>, 2022

Dear referee, this is related to the style of the journal. Once all comments of the referees have been addressed by the authors and posted on the discussion forum then in the next step (after the closure of the discussion forum) a revised manuscript might be uploaded by the authors and dependant on the editor's decision he/she might ask you to review the manuscript again. Thanks and best regards, Frank Keppler
